

# Series 52

## Commercial / Domestic Tracking System

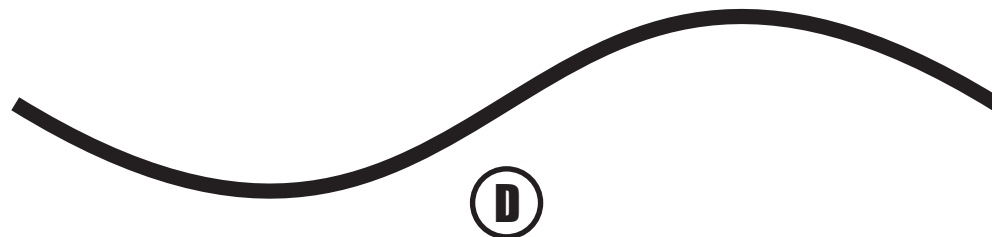

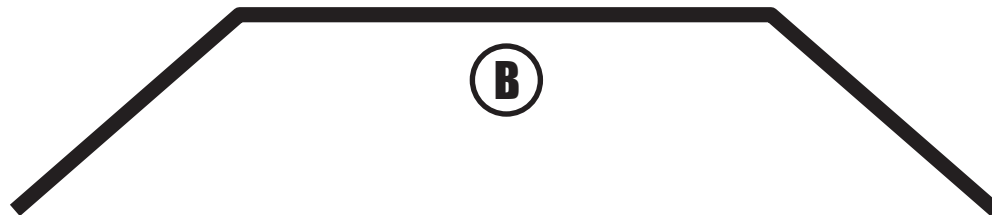

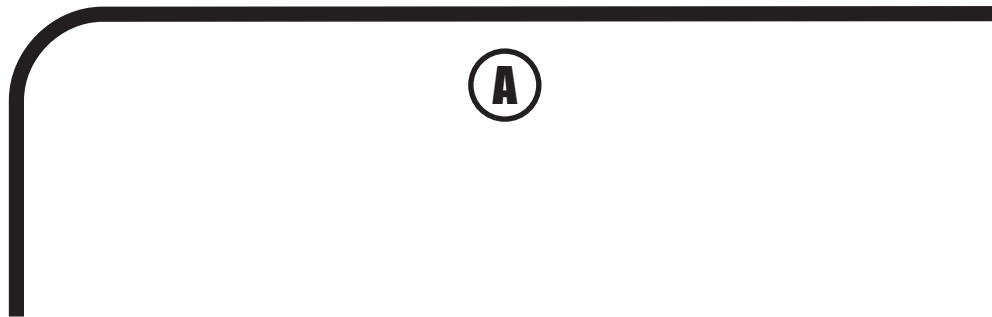

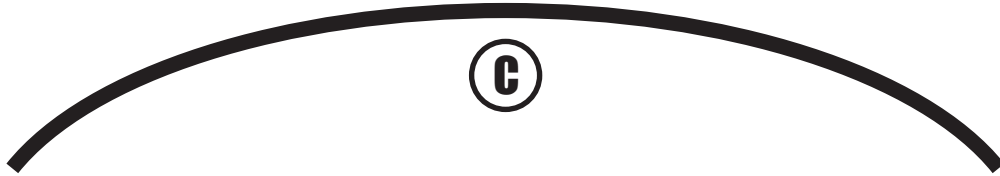

**Oslo Series 52** is a strong commercial/domestic tracking system suitable for heavy use areas such as hotels, motels, and clubs etc. Dimensions of 20mm x 16mm in 6 metre lengths, it is designed for use with heavier curtains which run on freewheeling roller carriers allowing smooth operation.

**Oslo Series 52** can be bent at 100mm, 250mm or curved to suit most applications as a hand drawn track, cord drawn on a straight track only. A comprehensive range of bracketing helps solve the most difficult installation problems.

Available in custom made to measure or as bulk componentry in white and magnolia.

# Series 52

## Track Bending

Note: Some bending that is not being collected from our factory could attract additional freight charges due to their size, shape, and the amount of packaging required to freight them safely.

A. & B. can be bent to 90 degrees on a 300mm radius. \$18.00 covers the first two bends on a single track, \$7.00 for each additional bend. Series 52 tracks can only be hand drawn on bends.

C. & D. can be bent on a continuous curve, \$48.00 for a continuous curve per track section. Series 52 tracks can only be hand drawn on curved tracks.
