

Series 66

Decorative Rod Track System

Suitable for both S-Wave and conventional Curtains.

Oslo Series 66 is a quality decorator track that comes in plain and reeded profiles. The plain profile is available in Brass, Birch White, Black, Chrome and Anodised colours, while the reeded profile is available in Brass and Antique Brass finish.

Oslo Series 66 tracks can be both hand and cord drawn. The design of the slides keeps them in the vertical position, giving a neat appearance and a smooth operation. There are two choices of slides available, one being the standard look ring and the other is a ringless slide giving a smooth modern line.

Oslo Series 66 can have a secondary track mounted behind in Brass, White, Birch White, Magnolia or Anodised finish. The secondary tracks can be mounted directly to Series 66 double brackets, or separately on short projection brackets.
